Experiment # 1

Installation Python

Objective

To download and install Python

Software Tool

1. python
2. sublime version 3.0
3. Operating system 8.1

0.1 Procedure: Task 1

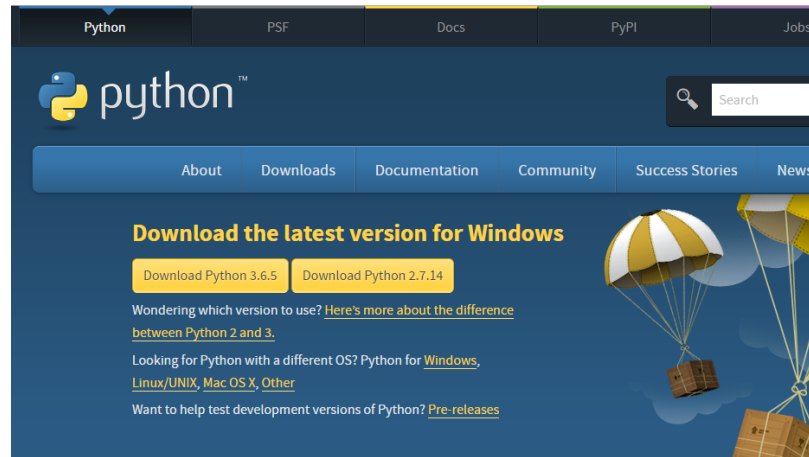

1 Python downloading Steps

1. The following page will appear in your browser.
2. Click the download Python 2.7.13
3. The file named python-2.7.13.exe should start downloading into your standard download folder.

This file is about 27 Mb so it might take a while to download fully if you are on a slow internet connection.

4. Move this file to a more permanent location, so that you can install Python.

5. Feel free to explore this webpage further; if you want to just continue the installation, you can terminate the tab browsing this webpage.
6. Start the Installing instructions directly below.

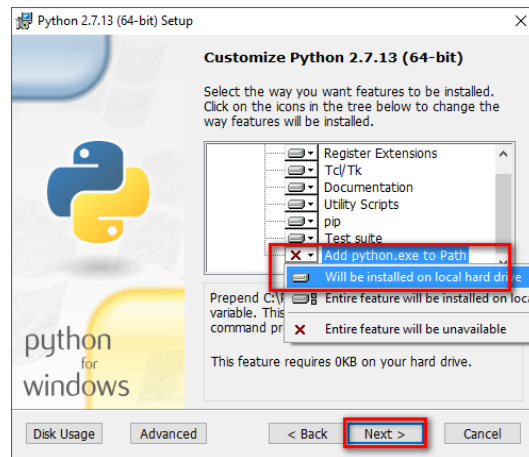

1.1 Procedure: Task 2

1.2 Python Installations Steps

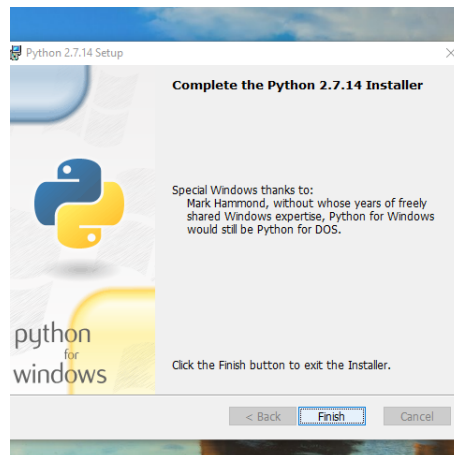

1. Double-click the icon labeling the file python-2.7.13.exe.

2. Highlight the Install Now (or Upgrade Now) message, and then click it.

3. Click the Next button.
4. A new Python 2.7.13 (64-bit) Setup pop-up window will appear with a Setup Progress message and a progress bar.
During installation, it will show the various components it is installing and move the progress bar towards completion. Soon, a new Python 2.7.13 (64-bit) Setup pop-up window will appear with a Setup was successfully message.

4. Click the Finish button.

2 Conclusion

By following the installation steps our required program is installed
